

4 Reasons Why You Should Equip Your Utility Vehicles With a Mobile Video Solution

Mobile video solutions are becoming more commonplace in the utility industry. Utility drivers travel from job site to job site, and companies need to ensure their drivers are following proper procedures, keeping them and others around them safe.

Likewise, the roads are littered with distracted and negligent drivers, so having cameras capturing the journey tells the whole story, exonerating your drivers from false claims.

Why Consider Mobile Video Solution?

There are several reasons for considering a mobile video solution for your utility truck.

Safety

The biggest reason to implement a mobile video solution is to keep everyone safe, including drivers and those around the drivers. According to the [Insurance Institute for Highway Safety](#), 4,119 people died in large truck crashes in 2019. Sixteen percent of these deaths were truck occupants, 67% were occupants of other passenger vehicles and 15% were pedestrians, bicyclists or motorcyclists.

Having side and rear cameras helps drivers navigate congested areas and reduces accidents, thus reducing downtime to make repairs and keeping your fleet running at maximum efficiency.

Exonerate Drivers

When driving at high speeds on freeways, accidents can happen in an instance. It can be difficult for utility truck drivers to remember the incident exactly how it happened. However, with 360° coverage surrounding your vehicles, you will have video evidence as to how an accident happened. Video solutions protect your drivers from false claims and save you money on unnecessary litigation costs.

Tell the Whole Story

Everyone wants to know the truth, and mobile video solutions provide that. With multiple camera angles and cameras focused on the road and drivers, you can get all the details should an incident occur.

Coach/Train Drivers

Recorded footage is great for training new employees or revisiting safety procedures with current employees. Ensure proper protocols are being followed and correct unsafe driver behavior with real-world lessons.

From aerial and crane trucks to service bodies and everything in between, no matter what type of utility trucks you operate, there are several reasons to invest in a mobile video solution.

About Pro-Vision

Founded in 2003, Pro-Vision is a leading video technology solutions provider trusted by thousands of organizations in 58 countries. Pro-Vision solutions include vehicle video recording systems, body-worn cameras, data management and cloud-based storage solutions. Pro-Vision's transit, law enforcement and commercial partners utilize these solutions to enhance safety, increase productivity and protect critical assets.
